

EXAMPLE OF A NOMINATION FOR A HCP

Nominee: Professor Donnelly

Connection to Neuroendocrine Cancer: Healthcare Professional

I am nominating Professor Donnelly for the Neuroendocrine Cancer UK Hero Award because of her extraordinary dedication, compassion, and clinical excellence in caring for me as a neuroendocrine cancer patient.

Prof Donnelly has consistently gone above and beyond to make time for my concerns and offer me information, advice and guidance particularly when I feel the most confused and alone.

From my very first appointment, she took the time to listen deeply, not just to my symptoms, but to my fears, my questions, and my need to feel like more than just a diagnosis. She made an overwhelming experience manageable through clear explanations, patience, and an unwavering commitment to collaborative care.

Prof Donnelly is not only a brilliant clinician but also an advocate for NET patients. She has regularly spoken in webinars, helping to educate others about neuroendocrine cancer and she is integral in co-ordinating my care across a multi-disciplinary team.

For e.g. Prof Donnelly took the initiative to offer me information about support services, including NCUK, which became a lifeline for me and my family. When new treatment options became available, she worked tirelessly to secure them for me, even navigating complex approval processes and appeals.
